YOUR COMPLETE KIT FOR A HEALTHY LAWN, GARDEN, AND SOIL.

UltraGrow

The UltraGrow® Collection of growing media redefines quality landscaping soils, potting mixes, and conditioners.

The range is infused with nutrients, waste-free, long-lasting, and crafted in small batches. Demand more from your garden.

Use **UltraGrow**.

UltraGrow soils and potting mixes are leading the way.

For a healthy garden, you'll need healthy soil. That's why choosing the right soil is essential. For over 30 years, Centenary Landscaping Supplies has been producing top-level lawn care supplies to ensure our customers have a healthy garden. We use only the best ingredients, and our soil is tested to ensure its quality. UltraGrow soil is rich in nutrients and perfect for all types of plants. It's also easy to use and we offer a variety of sizes to fit your needs. Browse our range of soil suppliers, grass fertiliser, lawn boosters and more to enhance the quality of your garden.

Waste-free with no
stinking nasties

Infused with nutrients
and microbes

Long-lasting and
biologically active

Crafted in small
controlled batches

No nasties in this little one's garden.

UltraGrow – Growing Media and Nutrients You Can Trust

Whether you're a home gardener, professional landscaper, or landscape architect, quality soil makes all the difference. Since 1986, UltraGrow has been committed to delivering outstanding soils, composts and potting mixes crafted from the finest raw materials and essential nutrients. Our small-batch blending process ensures consistent, high-quality results unmatched in the market that keep landscapes lush and gardens flourishing year-round.

UltraGrow was born out of a need for better options in the market, addressing the frustration with low-quality, mass-produced products. Created by Centenary Landscaping Supplies, our custom-blended growing media are free from industrial liquid waste and made from certified fully composted, sustainable green organics, providing unmatched quality for every planting project.

Today, UltraGrow is a trusted name among home gardeners, landscapers, and landscape architects alike. With UltraGrow, you can be sure your projects—big or small—get the support they need for outstanding growth and long-lasting beauty.

GARDEN SOIL BLENDS - IN ORDER OF QUALITY

It's What's Inside That Counts

UltraGrow soils, potting mixes, and composts are carefully crafted with a blend of natural ingredients, essential nutrients, and advanced soil conditioners to support healthy plant growth. These unique blends ensure optimum soil structure, moisture retention, and nutrient availability for your plants. By combining both traditional and innovative ingredients, we help plants thrive, developing strong roots, vibrant foliage, and abundant blooms. Here's a list of what we include.

Key ingredients and nutrients enriching our UltraGrow Garden Soil Blends:

- 16 Month Controlled Release Fertiliser - Red Jacket
- Coir Fibre
- Coarse Sand
- Zeolite
- Water holding Bentonite and Pumice
- Composted Bark 0mm to 10mm
- Perlite
- Sea-weed concentrate
- Biostimulants to help plants access nutrients efficiently
- Rock mineral
- Amino Acids
- Iron Sulphate
- Potash
- Trace Elements
- Seaweed Extract with Bacillus Microbes
- Bio-char
- 3 x Controlled Release Urea to boost nitrogen availability
- Blood & Bone
- Micronised Gypsum
- Fish meal
- Humic and Fulvic soluble extracts
- pH stabilisers
- Moisture Balancer without plastic crystals

UltraGrow EVOLUTION PRO-MAXX

The Pinnacle of Soil Excellence for Discerning Gardeners

The UltraGrow Evolution Garden Blend is designed to provide your garden with the best possible growing environment using advanced soil technology. We've combined over 34 years of soil expertise to create this premium blend that helps your plants and lawn thrive by focusing on healthy soil. This soil mix goes beyond what's typically available, offering a rich combination of high-quality ingredients sourced from Southeast Queensland.

This blend mimics the natural forest floor, which is filled with living organisms, minerals, and beneficial microbes. It has exceptional air and water retention, so your plants grow stronger and more resilient with less watering. Plus, you won't need to add any extra fertiliser for up to 16 months. It's the perfect long-term solution for home gardeners who want to get the best out of their investment in expensive plants.

UltraGrow Evolution Garden Blend is crafted in small batches to ensure every scoop delivers premium performance for your plants. Whether you're growing flowers, vegetables, or shrubs, this blend gives them the nutrients, slow-release fertilisers, and bio-stimulants they need to flourish. Not suitable for sensitive natives.

Bulk Density = 1.0 Tonne / 1 M³
Average pH = 7.0

UltraGrow PLATINUM® GARDEN SOIL

The absolute crème de la crème of soils for garden lovers

The rich dark pedigree of Platinum Garden Soil Blend is authentic to the essence of the UltraGrow brand which is 'crafted by excellence without compromise'. Its scientific formulation is a blend of ideal components free from liquid and un-composted green-waste. It boasts the addition of carbon, a range of beneficial microbes and humates to enhance nutrient up-take. The ingredient list below shows you the full suite of components.

Platinum Garden Soil Blend comprises a very high concentration of bio-inoculants like Bacillus subtilis blended with seaweed creating a living organism which matures and improves over time. Further, it's primed for immediate plant establishment and superior growth for up to 16-months and beyond. These features combined with 70% of our Valley Natural Soil and minerals creating a crafted garden soil that is the industry leader according to our customers. It's ideal for all kinds of garden applications including, new garden beds, veggie patches and digging into tired garden beds or under turf. Not suitable for sensitive natives.

Bulk Density = 1.0 Tonne / 1 M³
Average pH = 7.0

UltraGrow BLACK LABEL GARDEN SOIL

Superior performance garden soil

Black Label is a premium, nutrient-rich garden blend meticulously crafted by our expert soil scientists and practitioners. Unlike many garden soils that rely heavily on industrial liquids and poorly composted green waste, Black Label is formulated with high-quality ingredients to create a living, thriving environment for your plants.

This unique, science-based formula is packed with a high concentration of microbial inoculants, transforming your soil into a vibrant ecosystem ready for immediate plant growth. Unlike other soils that contain up to 80-100% green waste, Black Label features 65% natural topsoil. This blend nourishes your garden for up to 16 months, with a rich mix of composted animal manures, seaweed and humic extracts, rock minerals, bio-char, blood & bone, gypsum, fish meal, pH stabilizers, and long-term soil wetting compounds. The result? Healthier, more vibrant plants with reduced watering needs—up to 50% less, surpassing Australian Standard AS 4419.

Ideal for all garden types, including new or existing garden beds, veggie patches, and even under turf, Black Label Garden Blend ensures your plants will thrive and flourish. Please note, it is not suitable for very sensitive natives. Let your garden reward you with lush, spectacular growth!

Bulk Density = 1.0 Tonne / 1 M³
Average pH = 7.0

UltraGrow ULTIMA GARDEN SOIL

High-performance soil for the organic gardener - certified by SXC for organic farming practices

Designed specifically for the organic gardener, UltraGrow Ultima Garden Blend is a balanced, mid-range soil that delivers exceptional results. This blend combines 60% natural soil with rock minerals, compost, potting mix, and our renowned UltraGrow Activator, packed with a full suite of natural nutrients. While it may not be as nutrient-dense as the premium UltraGrow Soil Blends, it embodies the true essence of the UltraGrow philosophy.

UltraGrow Ultima Garden Blend provides the nutrients your garden needs to flourish, making it the ideal choice for organic garden beds, veggie patches, and general garden use.

What's inside:

- Certified Natural Topsoil
- Fully composted green organics
- Ash and composted bark-based potting mix
- Enviro Compost (Certified AS-4454)
- Rock minerals
- New Zealand Zeolite
- Blood and Bone
- Composted animal manure
- Bio-inoculants, including *Bacillus subtilis*
- Potash (SOP)
- Essential trace elements
- Boron
- Dolomite
- Humates/Fulvates
- Carbon
- Amino acids
- NutriPlus Microbial Fertiliser
- Seaweed with beneficial bacillus microbes
- AZ 11 Chelated Micronutrients
- Organic Life Fertiliser

Bulk Density = 1.0 Tonne / 1 M³
Average pH = 7.0

\$ 139 /tonne

UltraGrow SUPREME GARDEN SOIL

A balanced, versatile garden mix for everyday use

Supreme Garden Soil is a carefully crafted blend of natural light sandy loam, fully composted green organics, and crusher dust, enhanced with a light touch of nutrients to support plant growth for up to a month. This mid-priced garden mix features 75% natural soil, setting it apart from many so-called premium products on the market that are primarily green waste.

Perfect for creating garden beds and laying under turf, Supreme Garden Soil incorporates biologically composted green organics to support plant health. For optimal results, we recommend pairing this soil with quality fertilisers and soil conditioning additives from the UltraGrow Collection to further boost performance.

Note: Not suitable for sensitive native plants. For native gardens, consider using our Turf Blend Natural Soil.

Bulk Density = 1.2 Tonne / 1 M³
Average pH = 7.0

\$99 /tonne

TRADE SOIL MIX

Affordable versatile soil for bulk landscaping

Trade Soil Mix is a cost-effective standard blend of composted green waste organics combined with various soils and minerals, making it suitable for a wide range of bulk installations. Designed for general garden use, this soil mix provides an economical solution for large-scale landscaping projects. Often used as a base so better quality choices can be installed on top.

Please Note: Not recommended for veggie gardens. Regular fertilisation is essential to maintain performance, and some settling over time can be expected. For the best results, we highly recommend supplementing with quality fertilisers and conditioning additives from the UltraGrow Collection to enhance its effectiveness.

Bulk Density = 1.0 Tonne / 1 M³
Average pH = 7.0

\$69 /tonne

TURFING (UNDER & OVER)

UltraGrow LAWN PRO-MAXX FOUNDATION

The Pinnacle of Soil Excellence for Discerning Gardeners

Lawn Pro-MAXX Foundation Soil is engineered for lawn perfection. Crafted from over 75% natural soil and minerals, this premium under-lawn foundation is designed to support healthy root growth, ensuring long-lasting, lush results with minimal slumping or maintenance. Lawn Pro-MAXX is the ideal base for establishing the vibrant, resilient lawn you've always envisioned.

Unlike cheaper underlays, Lawn Pro-MAXX includes a 16-month controlled-release fertiliser and a 3-month nutrient blend, combined with cutting-edge carbon technology. The rich blend of humates, fulvates, and microbial life creates a living soil that nurtures your lawn from root to blade. Moisture retention is maximised with Zeolite and UltraGrow's Moisture Balancer and Activator, ensuring your lawn remains hydrated and healthy.

Lawn Pro-MAXX Foundation Soil is perfect for lawn enthusiasts who want nothing but the best. It provides the ideal conditions for healthy root establishment and long-term lawn vitality, making it the ultimate choice for those seeking premium lawn care.

Key Features

- Over 75% natural soil and minerals for reduced slumping
- 16-month controlled-release fertiliser
- 3-month slow-release nutrients
- Advanced carbon technology for a living, microbe-rich soil
- Superior moisture retention with Zeolite and other activators
- Designed to create a perfect foundation for lush, resilient lawns

Top Ingredients

- Over 75% natural soil and minerals for stability and structure
- Controlled-release fertilisers for optimal nutrient uptake
- Humates, fulvates, Leonardite, rock phosphate, carbohydrates, and microbes (Bacillus, Azotobacter, Trichoderma, Saccharomyces)
- New Zealand Zeolite and UltraGrow's Moisture Balancer and Activator for moisture retention

Bulk Density = 1.1 Tonne / 1 M³
Average pH = 7.0

\$ 197 /tonne

UltraGrow SPECIAL BLEND TOP DRESSING

Special Blend is a sandy loam sourced from the Lockyer Valley processed through a 6mm screen, making it one of the finest soil-based top dressings on the market compared to green waste-based products. It is blended with our Enviro Compost, adding carbon and natural nutrients into the soil.

It can be used as rich soil for under and over turf or as a fine 6mm screened garden soil. Boost performance of this product through the addition of quality fertiliser.

Bulk Density = 1.2 Tonne / 1 M³

\$ 113 /tonne

\$13 /25L bag

A1 TOP DRESSING SOIL

An excellent light composted organic top dressing option made up of screened organic compost and sand. A1 has a nice balance of nutrients and manure. It helps to increase nutrient retention and improves drainage.

We recommend combining your top dressing application with a quality fertiliser such as UltraGrow Lawn Revitaliser.

Bulk Density = 1.0 Tonne / 1 M³

\$109 /tonne

FAIRWAY PRO-MAXX LAWN BUILDER

Fairway Pro-MAXX is a new generation of lawn top dressing sand suitable for the avid lawn fanatic looking to take their lawn surface to the next level. Small batch blended with the very best ingredients, Fairway Pro-MAXX will feed and smooth your lawn, improve your profile and encourage the long term health of your soil.

Featuring a host of ingredients including a high quality granular fertiliser (10-2-8-6) plus micro elements, humic acid, micronized gypsum, highly soluble kelp powder made from Ascophyllum nodosum seaweed and a beneficial microbe-Bacillus subtilis supplement all correctly dosed for up to a 10mm application.

Bulk Density = 1.5 Tonne / 1 M³

\$118 /tonne

WASHED PIT SAND

A premium grade south beach sand used in construction. It has been double washed and finely graded making it perfect for top dressing lawns for the purist greens-keeper.

Bulk Density = 1.5 Tonne / 1 M³

\$85 /tonne

TURF BLEND NATURAL SOIL

Turf Blend Soil is a quality natural light sandy soil mixed with around 10% AS-4454 certified compost so it satisfies the requirements of AS-4419 (landscape soils).

This natural soil is low in phosphorus making it suitable for the most sensitive of natives. It's free of liquid and green waste. Add in a composted soil conditioner for best results.

Bulk Density = 1.28 Tonne / 1 M³

\$92 /tonne

POTTING MIX

UltraGrow PLATINUM® POTTING MIX

Premium Certified AS-3743

\$ 399 /M³

Platinum Potting Mix is a certified Professional & Ultra-Premium Grade Potting Mix formulated in conjunction with consulting soil scientists and practitioners while going well beyond the requirements of AU Standard-3743.

It contains advanced biological organic based ingredients with the addition of *Bacillus subtilis*, other beneficial microbes, kelp concentrate, carbon and humates which boost the natural and living biological activity in your mix. These are combined with long lasting sustainable organic biochar and rock substrates like zeolite, perlite and coir that inhibit nutrients leaching into the environment with little slumpage.

Platinum Potting Mix is crafted in small batches without compromise, creating a certified ultra-premium grade mix you can rely on to give you the best results possible. Your plants will have the benefit of a full spectrum of slow and controlled release fertilisers, along with macro and micro nutrients to provide vigour and resilience.

We've incorporated biological organic based ingredients such as amino acids, humates, enriched composted manure and sea-weed concentrate, making our product unique in the industry.

\$16 /25L bag

What's inside:

- 16 Month Controlled Release Fertiliser - Red Jacket
- Coir Fibre
- Coarse Sand
- Zeolite
- Water holding Bentonite and Pumice
- Composted Bark 0mm to 10mm
- Perlite
- Sea-weed concentrate
- Biostimulants to help plants access nutrients efficiently
- Rock mineral
- Amino Acids
- Iron Sulphate
- Potash
- Trace Elements
- Seaweed Extract with *Bacillus* Microbes
- Bio-char
- 3 x Controlled Release Urea to boost nitrogen availability
- Blood & Bone
- Micronised Gypsum
- Fish meal
- Humic and Fulvic soluble extracts
- pH stabilisers
- Moisture Balancer without plastic crystals

UltraGrow GP43 POTTING MIX

\$11⁰⁰ /25L bag

GP43 Potting Mix is suitable for general use and natives. It balances quality ingredients based on the principles that elevate UltraGrow above the competition while providing excellent value. GP43 is a premium-grade mix incorporating high-quality ingredients and micronutrients selected to enhance plant vigour.

What's inside:

- 16 Month Controlled Release Fertiliser
- Enriched composted
- Coir Fibre
- Coarse Sand
- Seaweed Extract
- Humic and Fulvic extracts
- Rock mineral
- Potash
- Trace Elements
- Zeolite
- Perlite

UltraGrow CACTI & SUCCULENT MIX

\$16⁰⁰ /25L bag

The UltraGrow Cacti & Succulent Potting Mix is a new and specially formulated mix for cacti and succulents. It has been designed to meet the needs of even the most fastidious succulent growers, with an open, free-flowing structure that is ideal for these plants.

MADE TO ORDER IN BULK

Supercharge growth with Dyna-Maxx Plant Health treatment, a concentrated seaweed based soil conditioner.

DYNA-MAXX
Natural Seaweed Plant Health Treatment

SPECIALIST GROWING MEDIA

UltraGrow ON SLAB PODIUM SOIL®

Certified SLD E Spec
Bulk Density = 0.78 Tonne / 1 M³

\$ 175 /tonne

UltraGrow Podium Soil On Slab is available in specific blends to suit both an A Horizon and B Horizon application. It is a lightweight soil mix designed and tested to meet rigorous standards set out by Simon Leake and Elke Haege in SLD, specifically in the area of On Slab application (Specification E1: On slab soil media 'A' Horizon & Specification E2: On slab soil media 'B' Horizon). This soil has been designed for use in large podium / suspended garden applications where waste-free quality is desired while plant health and ongoing plant support is a must.

On Slab A & B combines long-lasting sustainable media organic rock substrates that don't slump and have enough nutrients to feed and maintain plant health for up to 16-months. It's liquid & green waste-free.

- On Slab soil tested against Specification: E1 & E2 designed by Simon Leake and Elke in Soils for Landscape Development.
- Suitable for Brisbane City Council On Slab Applications as set out in Brisbane Standard Drawing – BSD-9004
- Blends that go far beyond the widely used standards set out in AS 4419:2018
- Blended using AS-4454 compliant compost.
- Free from liquid and industrial waste.
- Incorporating a 16-month slow-release fertiliser, and trace elements to encourage healthy plant growth.

PODIUM SOIL® MIX

Certified SLD E Spec
Bulk Density = 0.80 Tonne / 1 M³

\$ 127 /tonne

A lightweight commercial soil mix tested under AS-4419 designed for use as the top 300-500mm soil horizon in large containers, on slab or in podium planters. This podium blend incorporates clean green-waste compost, ash and loam top soil with the addition of micro trace inputs and fertiliser for immediate results.

SOIL IMPROVERS & COMPOSTS

UltraGrow ACTIVATOR SOIL CONDITIONER

\$15 /25L bag

\$ 299 /M³

Activator Soil Conditioner incorporates the best available organic composts, minerals and biological additives to create this spectacular natural soil conditioner that's free of synthetic chemicals, industrial liquids and green waste. It contains a high concentration of beneficial microbial inoculants, humates, rock minerals and moisture holding minerals excluding crystal polymers.

Featuring 22 natural ingredients that are SXC Certified Inputs Suitable for Organic Farming:

- | | | |
|------------------------------|------------------|--------------------------------------|
| • Enviro Compost | • Pumice | • Kelp Soluble Concentrate |
| • Coir Fibre (not sawdust) | • Perlite | • Basalt Rock (1mm-3mm) |
| • Fish Emulsion | • Bio-char | • Microbial Inoculants like Bacillus |
| • Humate | • Blood & Bone | • Potash |
| • N Bio Fine Granular Powder | • Gypsum | • Composted Manures |
| • Zeolite | • Trace Elements | |

UltraGrow MOISTURE BALANCER

\$22 /25L bag

A unique non-crystal moisture holding agent that improves water penetration helping to prevent drying in gardens, lawns and containers. It achieves this by lowering the surface resistance of the growing media which prevents water penetration.

It also encourages the media to hold more moisture for a longer period of time while slowing leaching. Though not a fertiliser, Moisture Balancer Soil Wetter contains micro nutrients from the composted ingredients and rock phosphate that will provide nutritional benefits to plants.

REVITALISER

Garden & Lawn Fertiliser

Revitaliser contains a full suite of trace elements, organic carbon humates, cation exchange enhancements and root stimulants and will boost your lawn and gardens resilience and performance.

Couple fertiliser applications with humate to supercharge performance.

SOIL IMPROVERS & COMPOSTS

COMPOSTED BARK – 0-5mm & 6-10mm

A black composted bark available in two sizes, suitable for mulching gardens and pots. We use it in making many of our soils and potting mixes. You can also dig it into your garden to help aerate or make your own potting mix.

\$16 /40L bag

\$293 /M³

ENVIRO COMPOST

Enviro Compost / Humus is a unique fully composted soil conditioner. The composting process changes the original feed stock into a dark humus that locks in nitrogenous carbon that will last for many years. Enviro Compost / Humus is a clean nutrient rich product which is liquid and green waste free.

\$16 /25L bag

\$279 /tonne

FOREST FINES COMPOST

A finely screened (8mm) green organic that is 80% composted. Suitable as a mulch (top of soil) and blending into your existing soil but there will be a need to add a general fertiliser like Revitaliser or Organic Life Fines to boost nutrients.

\$12⁰⁰ /40L bag

\$142 /M³

RECONSTITUTED COIR PITH

Coir is a peat-like substance made from the pith found between the coconut fibres. The coir pith gets washed, heat treated, sieved, to remove large particles and graded. It improves the air porosity of soils, even when wet, and aids in moisture retention. Coir absorbs 30% more water than peat and is much easier to re-wet, when dry.

\$16⁰⁰ /block (approx 60L)

\$399 /M³

ULTRAGROW FERTILISERS

REVITALISER FERTILISER

UltraGrow Revitaliser contains a full suite of trace elements, organic carbon humates, cation exchange enhancements and root stimulants and will boost your gardens resilience and performance. Revitaliser is a complete rock mineral NPKS fertiliser impregnated with beneficial microbes and is designed to enhance garden and lawn surfaces by providing balanced nutrition for strong root growth.

Typical Analysis: NKPS 16-3-7-4

Revitaliser 5KG \$20.00
Revitaliser 20KG \$50.00

NITRO-PRO MAXX MINI

UltraGrow Nitro-Pro Maxx is a professional grade mini prill turf fertiliser, containing upfront and multiple controlled release sources of nitrogen for optimum release rate and sustained turf growth.

Typical Analysis: NKPS 20-2-16-3

Nitro-Pro 5KG \$35.00
Nitro-Pro 20KG \$120.00

ULTRACOTE CONTROLLED RELEASE

The Ultracote range is of controlled release fertilisers are available in a 12-month Native blend & a 16-month feed option, coated with an outstanding tough and resilient polymer coating. Each granule contains all major nutrients and trace elements which are necessary for optimal growth. The nutrients supply coincides with the physiological requirements of your plants for up to 16-months in ideal conditions.

Ultracote 12 Yellow Jacket Native 3KG \$24.95
Ultracote 16 Red Jacket 3KG \$29.97

AQUATEN WETTING AGENT

UltraGrow Aquaten consists of at least 40% super absorbent anionic polyacrylamide polymers that are crossed-linked and insoluble in water. The polymers have the property of easily releasing absorbed water and nutrients, thereby allowing plants to have water and nutrients available as needed.

UltraGrow Aquaten incorporates a high quality volcanic pumice stone and a complete rock mineral NPKS fertiliser impregnated with beneficial microbes, a full suite of trace elements, organic carbon humates, cation exchange enhancements and root stimulants. These combine to improve plant establishment and garden resilience. Aquaten provides balanced nutrition and increased water holding capacity for strong sustained root growth and development.

Aquaten 5KG \$110.00
Aquaten 20KG \$350.00

ULTRAGROW BIO LIQUIDS

DYNA-MAXX SEAWEED

UltraGrow Dyna-Maxx is a super concentrated premium seaweed based soil conditioner. It is a certified input for organic farm applications and is comprised of a host of natural nutrients, including trace elements, organic carbon, amino acids plus growth-promoting substances including humic and fulvic acids. Dyna-Maxx is a powerful and natural growth stimulant crawling with billions of beneficial microbes.

1L Concentrate	\$15.00
5L Concentrate	\$60.00

MICROBIAL LIFE

UltraGrow Microbial-Life is a superior, highly concentrated formula with 24 strains of beneficial soil microbes, including Bacillus strains, humic acid, kelp, amino acids, vitamins, and natural sugars. Unlike diluted products, this potent blend is designed to enhance microbial growth in your garden soil, creating a 'living soil' much like a natural forest. A thriving microbial community is key to healthy soil, supporting strong plant growth and resilience. Carefully cultivated under precise conditions, this powerful formula is ideal for both soil and foliar use, boosting plant health and vitality

BARKS & MULCHES

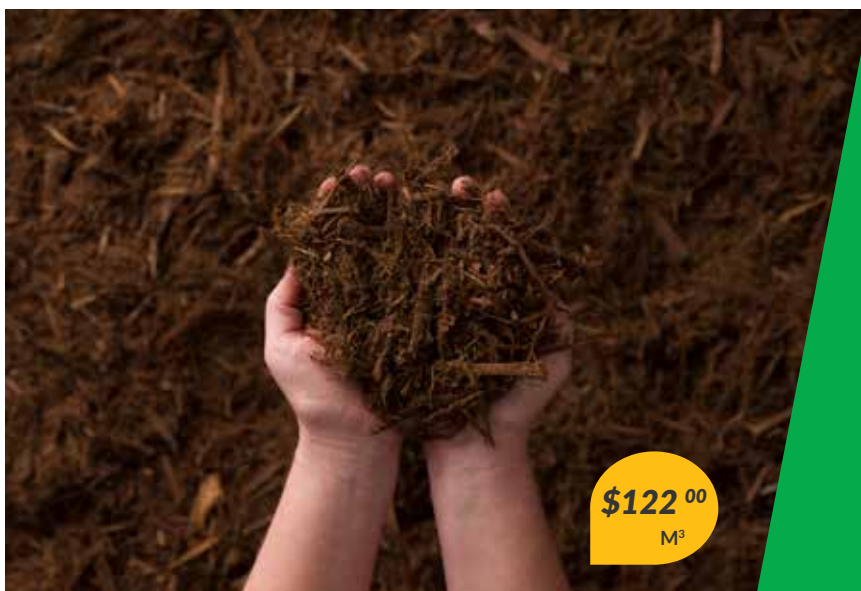

TEA TREE MULCH

Tea Tree Mulch is environmentally friendly, made from unused products left after the Tea Tree Oil making process. It is fragrant with a beautiful, dark, rich colour which will enhance the look of any garden.

HOOP MEDIUM BARK

Hoop bark is an extremely popular product. Its 1" strips hold well on embankments.

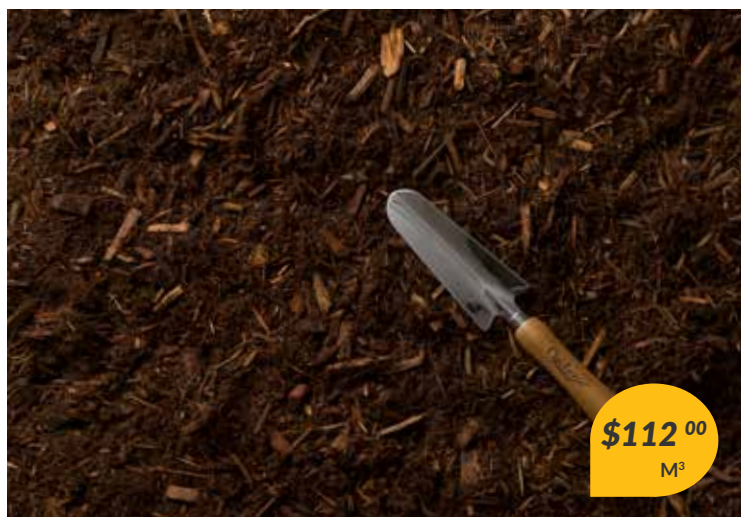

RED CYPRESS MULCH

A fibrous cypress mulch that is naturally pest and termite resistant.

Mulch Advice

Mulch is one of the most important additions to any garden bed. It protects the soil from the sun, helps retain moisture and keeps down the weeds.

Cypress mulches have the added bonus of being naturally insect resistant. Check out the full range in-store.

BLENDED CYPRESS FINES

A blend of fines and small chip from the cypress pine tree.

CYPRESS WOODCHIP

A clean blonde woodchip with a fresh smell.

Drought-proof your garden

COVER YOUR SOIL - Mulch is one of the most important things for the healthy growth of a garden. Weed prevention and temperature control are just a few of the benefits of using mulch, while the most valuable reason is moisture control. Without mulch, natural elements rapidly dry out the soil surrounding your plants, increasing the need to water on a regular basis. Mulch will help retain the water in your garden beds, reducing water usage.

STORE YOUR WATER - With Queensland in states of drought at various times, water is precious. Inevitably we are going to face more water restrictions. Now is the time to install water capturing systems. When planning a new lawn or garden, take the time to install in-ground irrigation systems like drippers which will slowly and efficiently serve up your plants just the right amount of water with zero wastage.

MAXIMISE MOISTURE - Soil additives such as organic composts, zeolite, perlite and Moisture Balancer are all designed to maximise water retention in the soil. A plant can only take up so much water at any given time, so saturating your sandy soil once a week, something that might seem efficient, will only feed your plants for a short time before drying out.

AGED CHIPPERS MULCH.....\$46 /M³

This is a coarse, budget chippers mulch consisting of a wood chipper green waste material that has been aged.

BLENDED CYPRESS FINES.....\$112 /M³

A blend of fine mulch and small chip from the cypress pine tree. A finer option when compared to traditional Red Cypress Mulch.

CYPRESS WOOD CHIP.....\$114 /M³

A clean golden wood chip of around 1" from the cypress pine tree.

COMPOSTED BARK.....\$293 /M³

A Stage 1 pasteurised composted bark ranging from 0-15mm. Ideal for mulching the garden as well as adding organic matter into old soil.

FOREST FINES COMPOST.....\$139 /M³

A finely screened green organic that is 80% composted. Suitable as a mulch (top of soil) and blending into your existing soil.

GREEN HARVEST MULCH.....\$56 /M³

12- week composted garden organics from green bin collections. Processed through a star screen removing dust and unwanted material.

HOOP BARK.....\$122 /M³

Coarse curly bark of around comprised of pieces between 25-50mm (1-2") thick. Hoop is a popular choice for embankments and has a pleasing natural appearance.

MIDNIGHT BLACK CYPRESS.....\$137 /M³

A dark black dyed Cypress mulch developed to enhance the natural greens and colours of a garden or landscape.

OCHRE RED CYPRESS MULCH.....\$137 /M³

Like the rich red sunsets of the Outback, our Ochre Red Cypress 100% Cypress with a natural dye put through it to give it that rich, vibrant red colour.

PINE NUGGET BARK.....\$122 /M³

Consisting of 15-25mm nuggets of tan bark. A great mulch with a light texture and red/brown colour. These little pieces are a traditional looking bark with a tidy appearance.

RED CYPRESS MULCH.....\$122 /M³

An attractive fibrous cypress mulch with a deep, rich red/brown colour; suitable for all gardens.

REGRIND MULCH.....\$48 /M³

Green-waste mulch ranging from fine to chunky. Tub ground twice and sourced from land clearing. *Please Note: it may contain foreign matter.

TEA TREE MULCH.....\$95 /M³

Fibrous dark mulch from the Tea Tree, which gives a natural and different look to your garden. It has a pleasant bush fragrance - reported to deter white ants and termites from your garden.

TROPICAL CYPRESS BLEND.....\$112 /M³

A good blend of cypress bark & wood chip that is one of the most economical of the cypress blends.

SUGAR CANE MULCH.....\$15 /BALE

LUCERNE MULCH.....\$18 /BALE

SOFT LANDING OPTIONS

PINE SOFT FALL.....\$189 /M³

A finely screened pine bark consistent and clean with 10mm nuggets often used in school playgrounds. It's also ideal for mulching small gardens, or heavily planted areas.

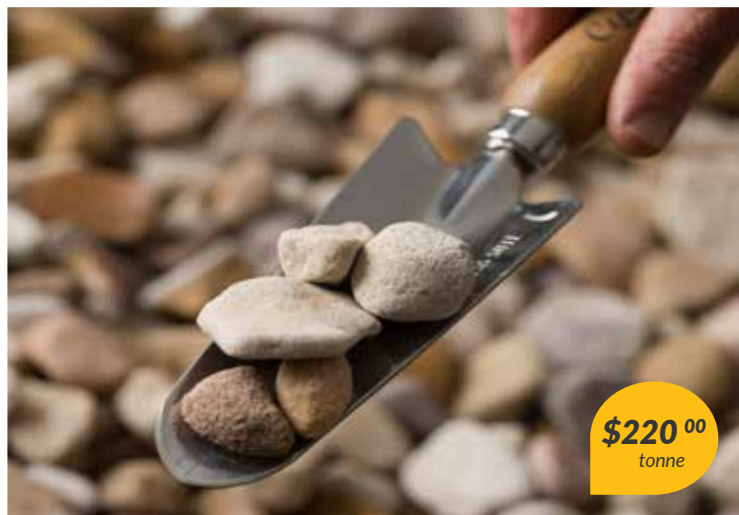

TAKURA SOFT FALL.....\$172 /M³

Takura is an engineered woodchip, pale in colour and suitable for use in all children's play areas as a pine bark alternative.

CERTIFIED SOFT FALL SAND.....\$128 /TONNE

A clean washed sand, externally tested and certified against AS4422 for falls in playground applications.

DECORATIVE PEBBLE, GRAVEL & STONE

TUMBLER SANDSTONE 50MM

Sourced from Helidon, QLD, Tumbled Sandstone is a beautifully rich sandstone pebble featuring the distinctive Australian sandstone swirls of gold and cream.

TENTERFIELD PEARL 40MM

Tenterfield Pearl 40mm is a striking ash-white pebble with hints of light grey. The smooth finish and bold colour makes it the perfect choice when looking for a feature white stone.

WINTER GREY 20-40MM

A dark blue/black pebble perfect for adding contrast and style to your garden or landscape design. Black in appearance when wet.

CASCADE PEBBLE 30-65MM

Cascade Pebble is a perfect option for all modern landscape designs featuring a great palette and a natural river worn appearance.

RIVER PEBBLE 40MM

A natural river pebble with a varied colour palette ranging from browns & tans through to yellow & gold.

Landscaping With Stone

USE AS A GARDEN MULCH The most common use for decorative pebbles is as a mulch in garden beds. Pebble mulch is a great option for a number of garden types and although initial install costs might be slightly higher than traditional tree mulch, long term maintenance costs will be greatly reduced. Why? Well tree bark and mulch, being organic in nature will inevitably break down and require replenishment. Expect to be replacing your mulch every 6-12 months and bark every 12-18 months. Decorative pebbles on the other hand can last a lifetime!

USE AS A GROUND COVER A great way to spruce up an otherwise dreary area is to add colour! And much like paint and carpet, decorative pebbles can do just that. If you have a neglected corner, an eroding pathway, or an unkempt and unwanted lawn, decorative pebbles might be your best option. We recommend at least a 50mm layer of pebble is used in order to get good even coverage and weed control matting is a must in these areas. In most cases with the use of weed mat (and a little bit of weed killer), the pebbles can go down straight over the existing surface for an instant facelift.

GARDEN & POT FEATURES One of the easiest ways to smarten up your deck, patio or backyard is with large potted plants. Sometimes planting into ground is just not possible whether you're renter or you have limited space. Our range of small to large feature pots are perfect for just that, and they can be finished off beautifully with a bag or two of decorative pebbles. With all the colours imaginable, you will have no trouble matching your pebble choice to your decor.

Which Sand is Best?

BRICKS, BLOCKS & PAVERS Construction sand is the foundation for all brick, block and paving projects and quality sand can make or break a job. Our sand is high quality and clean, preferred by tradies around Brisbane.

For paving, Medium or Coarse Bedding Sand is best, it really is a personal preference but for a DIY project we suggest you stick with Medium. For laying bricks and blocks, we stock both Brickies Loam and Washed Pit Sand respectively. The former as the name suggests is the preferred option for bricks as a fatty loam sand, while the latter is preferred for blocks. Washed Pit is also perfect for paving mortar edges mixed with cement at 4:1.

SAND PITS & JUMPING PITS Sand is commonly used in sand pits, jumping pits and playgrounds. We would recommend White Sand for a new sandpit, although Washed Pit Sand makes great sand castles, but is a grey colour. Soft Fall Sand may sound like the best options but it is certified to AS4422 as a soft landing product and is primarily used under play equipment such as swings or in jumping pits.

LAWN TOP DRESSING For top dressing, Washed Pit Sand or Fairway Pro-MAXX Sand are the pick of the bunch, perfect for a fine lawn where a cylinder mower is used. Sand is best used as a top dress after coring or aeration which is the process of punching small holes into your lawn and removing a core of compacted soil. Using sand in this case allows the coarse sand particles to fall into the newly punched holes improving the soil drainage and permeability.

Alternate between organic based top soils and sand top dressing each season to ensure your lawn is receiving enough of the good stuff the thrive.

Treated timber - what is the right choice for your project

WHAT IS CCA TREATMENT?

Copper chrome arsenate (CCA) treated timber is wood that has been treated with a preservative containing copper, chromium and arsenic. It should not be used to build children's play equipment, patios, domestic decking, handrails, new garden furniture, exterior seating or picnic tables. It is suitable for fencing and landscaping applications, and other structure foundations, residential construction, industrial and commercial construction, rural and farm use, fresh and salt water structures.

WHAT IS ACQ TREATMENT?

Like CCA, ACQ contains copper, which is non-toxic. It also contains a fungicide and a bactericide which makes your timber resistant to rotting. The quaternary ammonium compound acts as an insecticide and a biocide which helps fight copper-resistant microbes.

ACQ treatment provides protection against termites and rotting. It also protects the timber from high sunlight exposure. However, it does have a green tint unless you stain or paint it. ACQ treatment is the recommended treatment to be used in applications where direct human contact will be common such as sandpits, or play structures.

WHAT SHOULD I USE AND WHERE?

Constructing landscape retaining walls and fences from CCA Pine or Hardwood is completely safe and recommended. The level of treatment required for in-ground applications is H4, where as H3 is suitable for above ground such as fence palings and rails.

If building a sandpit, veggie patch or any other structure where regular contact might occur, **ACQ treatment is a must.**

GARDEN EDGING SOLUTIONS

FormBoss offers premium steel garden edging systems that are durable, flexible, and easy to install, allowing you to create sleek, professional designs for garden beds, paths, and other landscaping projects.

REDCOR® Steel is an alloy designed to give you an aesthetic rust that looks great and stands the test of time.

This steel has an increased resistance to corrosion. This is because the steel forms a protective layer on its surface under the influence of the weather, which regenerates continuously over the steel's life.

REDCOR 2.44m x 75mm (1.6mm steel)	\$38.72
REDCOR 2.44m x 100mm (1.6mm steel).....	\$45.98
REDCOR 2.44m x 150mm (1.6mm steel).....	\$59.18
REDCOR 2.44m x 185mm (1.6mm steel).....	\$73.70

REDCOR 2.44m x 230mm (2.0mm steel).....	\$107.36
REDCOR 2.44m x 290mm (2.0mm steel).....	\$133.10
REDCOR 2.44m x 390mm (2.0mm steel).....	\$177.65

REDCOR Tapered Stake x 240mm.....	\$3.64
REDCOR Tapered Stake x 300mm.....	\$4.84
REDCOR Tapered Stake x 400mm.....	\$6.06

GALVANISED steel will appear shiny and spangled when first purchased, however after a year or so the shine will dull down to a matte grey, although you will still notice the spangled effect.

Galvanised steel edging blends in, as grey is a neutral colour and doesn't take the focus off the plants and lines of the garden, it creates flawlessly separate contrasts in your design.

GALVANISED 2.44m x 75mm (1.6mm steel).....	\$38.72
GALVANISED 2.44m x 100mm (1.6mm steel)	\$45.98

Enrich Your Garden with Better Biology.

Your Complete Kit for Healthy Gardens.

Total soil, plant and garden health.

Waste-free soils with no nasties.

Infused with nutrients and long-lasting.

Garden Essentials

STRONG FOUNDATIONS

Set up for success. We recommend importing the best quality soil your initial landscaping budget will allow. While quality soil may seem expensive, the long term health for your garden will pay you back in spades. An inferior soil will require extra feeding, water and will increase plant mortality.

When building on your existing soil base, incorporate rich soil conditioners such as Activator to bring the life back to your garden beds.

THE BUILDING BLOCKS

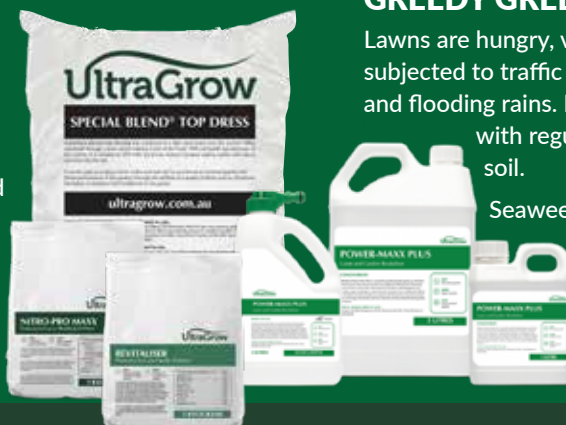

Like humans, plants need to be nurtured. Once in place, a properly prepared soil bed can sustain growth for a number of months however once the nutrients are depleted, feeding will be required.

Seaweed based soil conditioners combined with humate, fulvate and a quality soil wetter such as Water-Wise are the building blocks of great soil health increasing fertiliser effectiveness.

Lawn Essentials

CARE FOR YOUR SOIL

If you take care of your soil, your lawn will take care of itself (sort of). Grass roots generally penetrate only the top 100mm of soil. With such a small profile, it's important the soil is robust and structured to support healthy growth. Enrich soils through the addition of humate and compost as well as annual lawn renovations where rich organic based top dressing soils or sand are spread and raked into the soil profile to improve structure.

GREEDY GREENS

Lawns are hungry, very hungry. Further, they are subjected to traffic from feet to vehicles, scorching heat and flooding rains. It's important to provide your lawn with regular nutrients to feed the leaf and the soil.

Seaweed, Humic & Fulvic Acids ensure your soil will be in top shape while seasonal applications of traditional NKPS fertiliser in both liquid and granular will provide all the food for fast and luscious growth.

Top Dressing 101: Sand Versus Soil

There are only 2 reasons you would ever need to top dress a new or established lawn. The first is to improve the level, fill in holes or fix the grade and the second is to add nutrient back into the soil as part of your annual or regular lawn care program. In many cases, people find themselves top dressing to correct poor preparation. Both a lack of quality under soil and poor levelling or laying can expedite the need to top dress. So if you're just starting out in your lawn care journey, install the best soil your budget will allow.

USING SAND On its own sand will offer no nutritional benefit to your lawn or soil. But when strategically used to improve levels, drainage and soil structure, it can do wonders. Sand should be coupled with a liquid and granular feed in order to stimulate growth and aid in recovery. Top dressing can add extra stress to your lawn, so it is best not to do it in the extremes (cold and hot).

USING SOIL When top dressing for nutrients, a thin layer of organic soil mixture over the area of your lawn will add organic matter, natural nutrients and minerals back into your soil, and continue to provide food for your lawn to draw on.

WHICH IS RIGHT FOR YOU? Choose a top dressing soil if your lawn is in need of a boost as it will encourage the production of new shoots and result in a thicker lawn with the added benefits of pest and weed resistance.

Chose a sand option when you need to fill holes, repair uneven ground, improve drainage and soil structure. If you do decide to go down the sand route, it is recommended pairing a quality washed and sieved sand such as USGA Certified Sand with a quality lawn fertiliser to encourage fast growth and recovery.

For best results, aerate or core your lawn before dressing with either option.

Choose from the best lawn varieties, freshly cut & delivered to your home on the same day.

SIR WALTER DNA CERTIFIED BUFFALO

Sir Walter DNA Certified Buffalo Grass is Australia's favourite lawn; it's easy to maintain, stays green all year round and is very drought tolerant. Ideal for homes with children, family pets, shaded areas and sunny backyards, Sir Walter DNA Certified is the most versatile lawn option for the Queensland climate.

SIR GRANGE ZOYSIA

Sir Grange is a fine bladed premium turf variety, which has high shade tolerance and very low nutrient and water requirements. Sir Grange was originally developed for the golf industry but it was soon discovered that due to its characteristics, it would make a fantastic home lawn. Zoysia Grass is the ultra-premium extremely low maintenance option for the domestic lawn.

Cut & Delivered the Same Day • Quality Guaranteed

TURF VARIETIES

	Slab* 1200x600mm	M ² 1.38 Slabs
