Spring Top Dressing & Lawn Foundation Guide

Spring is one of the best times to give a lawn some attention. As turf moves back into active growth, top dressing can help smooth uneven areas, improve the lawn profile and support a healthier growing environment.

But choosing the right top dressing depends on what you are trying to achieve.

For customers wanting a premium lawn finish, **UltraGrow Fairway Pro-MAXX Top Dressing** is our higher-performance option. It is formulated not simply to level the surface, but to support the lawn and the soil beneath it.

UltraGrow Special Blend Top Dressing is a finely screened sandy loam blended with compost, making it an excellent choice where you want to level while also adding organic matter and nutrients.

A1 Top Dressing provides another organic-based option, while Washed Pit Sand is ideal when the main job is levelling, filling low spots or working sand into the profile after coring or aeration.

But there is another conversation we should be having if you're investing in new turf.

The lawn you see is only as good as the foundation underneath it.

Customers can spend thousands of dollars on premium turf, yet the turf still has to establish its roots into the soil below. Putting better growing media underneath gives your investment a stronger foundation from day one to flourish.

That may mean **Lawn Pro-MAXX Foundation Soil, UltraGrow Platinum Garden Soil, Black Label Garden Soil, Ultima Garden Soil** or **Turf Blend Natural Soil**, depending on the job, expected performance and budget.

Top dressing can improve and maintain a lawn over time. But when installing new turf, get the foundation right first.

Better soil supports better roots. Better roots support a better lawn.

Terry O'Shea
FOUNDER

Growing Media You Can Trust
Better Biology. Better Plants.

Every great garden and lawn begins below the surface.

Whether you're creating a new garden, improving your lawn or growing fresh vegetables, success starts with the right growing media. A healthy growing environment supports stronger roots, healthier plants and better long-term results. Our soil collection brings together practical everyday garden blends and premium biological growing systems, making it easy to choose the right product for your project, budget and gardening goals.

At the heart of our Pro and Advanced Series is UltraGrow, our premium biological growing media. Built on Advanced Biological Living Soil Technology and supported by our Biologically Activated Root Zone System, UltraGrow has been purposefully developed to help solve many of the common challenges gardeners face, including poor establishment, weak root development, tired soils and inconsistent plant performance. The result is biologically active growing environments that support healthier roots, stronger plants and real gardening success.

Our range of soils is organised into three performance tiers, helping you match the right level of performance to your gardening needs and budget.

PRO SERIES *Maximum biological performance.*

Our highest-performing growing media, featuring the most advanced UltraGrow formulations, premium ingredients and biological performance systems.

Designed for serious gardeners and professionals who want the very best long-lasting results, Pro Series products support stronger root development, healthier plants and outstanding long-term garden performance.

Ideal for premium landscapes, high-value planting projects and gardeners who refuse to compromise.

ADVANCED SERIES *Enhanced performance for serious gardeners.*

Advanced Series combines many of the biological benefits of UltraGrow with exceptional everyday value, making it the ideal choice for gardeners wanting professional-quality results across a wide range of planting applications.

Designed to support healthier soils, improved root-zone performance and reliable long-term plant growth without stepping up to the highest-performance products in the range.

STANDARD SERIES *Practical foundation.*

Standard Series products provide an economical growing foundation for home gardens and trade projects that are value-focused applications.

UltraGrow

We Engineer Growing Environments.

Healthy plants begin with healthy growing environments. Using our Advanced Biological Living Soil Technology and supported by our Biologically Activated Root Zone System,

UltraGrow creates biologically active growing environments that help plants establish faster, grow stronger and perform better over the long term.

Why gardeners choose UltraGrow:

- Supports healthy soil biology
- Encourages stronger root development
- Promotes long-term soil health
- Engineered for consistent plant performance over time.

Garden Soils

ENGINEERED GROWING ENVIRONMENTS FOR EVERY GARDEN

Creating a thriving garden starts from the ground up. Whether you're planting vibrant flowers or growing vegetables, setting the right foundation is essential. In this section, you'll find premium soil options tailored to various plant needs, soil improvers to enrich and condition your base soil, and protective mulches to help retain moisture and suppress weeds. The right mix of products, will create a flourishing garden.

CHOOSE THE RIGHT SOIL FOR YOUR GARDEN

UltraGrow Evolution Pro-MAXX

Bulk Density = 1.0 Tonne / 1 M3.

The highest-performing garden soil in the UltraGrow range. PRO

Designed for gardeners who want the very best growing environment for premium landscapes, productive gardens and showcase planting projects.

Evolution Pro-MAXX combines advanced biological inputs, premium ingredients and long-term nutrition to support exceptional root development, moisture performance and plant establishment. Not recommended for sensitive natives.

$258 / t
$15 / 20L Bag

UltraGrow Platinum Garden Soil

Bulk Density = 1.0 Tonne / 1 M3.

Complete biological performance for exceptional gardens. PRO

Platinum Garden Soil is developed for gardeners who want a high-performing growing environment across almost every planting application. Combining carefully selected natural soils, quality composts, minerals, nutrients and advanced biological inputs, Platinum creates a balanced root-zone environment that supports healthy establishment, efficient nutrient cycling and long-term soil health. Not recommended for sensitive natives.

$219 / t
$15 / 20L Bag

UltraGrow Black Label Garden Soil

Bulk Density = 1.0 Tonne / 1 M3.

Advanced biological performance for healthier gardens. ADVANCED

Black Label Garden Soil is designed for gardeners who want to achieve stronger plant performance through enhanced biological growing conditions. Formulated with a premium blend of natural top soil, quality composts, coir, biochar, minerals, nutrients and biological inputs, it creates a healthier growing environment that supports stronger roots. Not recommended for sensitive natives.

$179 / t
$13 / 20L Bag

UltraGrow Ultima Garden Soil

Bulk Density = 1.12 Tonne / 1 M3.

Natural soil performance with enhanced biological support. ADVANCED

Ultima Garden Soil is a versatile garden soil designed for gardeners wanting a balance of soil quality, biological activity and value. Built around a strong natural soil foundation and enhanced with compost, coir, biochar, minerals and biological inputs, Ultima supports healthy plant establishment, improved soil structure and long-term soil health.

$145 / t
$11 / 20L Bag

UltraGrow Supreme Garden Soil

Bulk Density = 1.15 Tonne / 1 M3.

Practical foundation for Everyday Gardens ADVANCED

Supreme Garden Soil provides a reliable foundation for general garden projects, helping gardeners establish plants successfully while maintaining excellent value. Designed for broad landscape use and can be further enhanced with the UltraGrow range of soil conditioners and fertilisers. The current formulation is built on a substantial natural soil base supported by compost, minerals and biological and nutritional inputs.

$105 / t
$8.40 / 20L Bag

Turf Blend Natural Top Soil

Bulk Density = 1.28 Tonne / 1 M3.

Natural soil for lawns, gardens and landscaping. ADVANCED

Natural Topsoil is a versatile natural soil for landscaping and planting projects, including new lawns, garden beds, trees and landscape improvement. Its balanced soil profile suits applications where a lower-organic growing medium is preferred or where fertilisers, soil conditioners and biological inputs will be added to suit specific planting needs.

$125 / t
$11 / 20L Bag

Trade Soil Mix

Bulk Density = 0.95 Tonne / 1 M3.

Practical growing media for large-scale projects. STANDARD

Trade Soil Mix is a cost-effective growing media designed for bulk landscaping and general site works where a reliable base is required. Ideal for filling, shaping and preparing large planting areas before further soil improvement programs are applied.

$76 / t
$7 / 20L Bag

IMPROVE YOUR EXISTING SOIL FOR BETTER PLANT PERFORMANCE.

Existing soil can lose structure, organic matter and biological activity over time. It may become compacted, difficult to wet or less able to support healthy plant growth. The right soil conditioner can help restore the root zone, improve soil structure and create better conditions for stronger roots and healthier plants. Choose the product according to the problem you need to solve.

What does your soil need?	Solution
Complete biological & structural improvement	UltraGrow Activator Soil Conditioner
Better water penetration & moisture distribution	Water Wise and/or Earth Ease
More composted organic matter	Enviro Compost or Activator
Practical everyday soil conditioning	EarthGrow Soil Conditioner
Better aeration & lighter structure	HydroGro Wood Fibre
Fine composted bark for soil & media blending	Composted pine Bark 6-12mm

UltraGrow Activator Soil Conditioner

Biological support for tired and depleted soils.

UltraGrow Activator is a biologically active soil conditioner designed to improve existing garden soil and support healthier root-zone conditions. It combines quality composted organic matter, minerals and biological inputs that help improve soil structure and create better conditions for root development and ongoing plant growth.

$431.86 / m³

$19 / 25L Bag

Water-Wise

Concentrated soil wetter that improves nutrient absorption.

Biologically enhanced soil conditioner that improves the structure of soils and helps with the break down of clay.

$120
/ 20kg Bag

Earth-Ease

Breaks up clay soil for healthier plant growth.

This liquid conditioner improves drainage, aeration, moisture retention and nutrient absorption, encouraging deeper roots and healthier lawns without manual digging.

see page 15 for sizes & prices

Enviro Compost

Add quality composted organic matter.

A fully composted organic soil conditioner that helps replenish organic matter and improve the growing environment. For an extra boost, apply UltraGrow Fusion Humate

$361 / t
$32 / 25L Bag

EarthGrow Soil Conditioner

Practical conditioning for depleted soil.

A blend of composted organic materials designed to add organic matter and help improve soil texture and growing conditions.

$118 / m³
$12 / 40L Bag

HydroGro Wood Fibre

Improve aeration and growing-media structure.

An Australian-made wood fibre substrate that helps create a lighter, more open soil or growing-media structure.

$234 / m³
$18⁹⁰ / 25L Bag

Composted Pine Bark 6-12mm

Fully composted bark for soil and media blending.

A fully composted, long-lasting soil conditioner commonly used in premium potting mixes. Its medium-grade particles improve soil structure, aeration and drainage while helping retain moisture and add valuable organic matter to existing garden soils.

$327 / m³
$18⁹⁰ / 25L Bag

Potting Mix With A Purpose

Plants grown in containers rely entirely on the growing media around their roots. The right potting mix helps provide the airflow, moisture balance and nutrient support needed for healthy growth. Our range includes UltraGrow Platinum for customers seeking the highest level of performance, specialist mixes for particular plant groups and practical everyday and value options.

ULTRAGROW PRO

UltraGrow Platinum Potting Mix

PRO

Bulk Density = .6 Tonne / 1 M3.

Complete biological performance for pots and planters.

UltraGrow Platinum Potting Mix is our highest-performing potting mix for gardeners who want to give their container plants a stronger growing foundation. Its carefully developed structure is designed to help balance airflow and moisture around the roots. Biological inputs and a broad nutrient package support plant establishment and healthy ongoing growth.

Made with quality composted bark, coir, biochar, zeolite and selected mineral and biological inputs, Platinum creates a biologically active root-zone environment for stronger container-plant performance.

$495 / m³

$18 / 25L Bag

SPECIALTY MIXES

Rocky Point Succulent & Cacti Mix

Free-draining media for plants that dislike wet feet.

A specialist potting mix developed to provide the drainage and root-zone aeration needed by succulents, cacti and other plants that prefer an open growing media.

$18.50 / 22L Bag

Rocky Point Orchid Mix

Open, free-draining media for healthy orchid roots.

A specialist orchid mix with the open structure needed to allow airflow and drainage around the root zone.

$13.80 / 30L Bag

Rocky Point Native Premium Potting Mix

NATIVE CONTAINER MIX

Low-phosphorus potting mix for Australian natives.

A specialist potting mix developed to provide the free-draining structure, airflow and moisture balance needed by Australian native plants grown in containers. Its low-phosphorus formulation includes controlled-release nutrition designed to feed plants for up to nine months, together with trace elements, minerals and composted organic matter.

$13.50 / 30L Bag

Rocky Point Native Mix

IN-GROUND NATIVE PLANTING

Low-phosphorus planting mix for native gardens.

A professional-grade, free-draining planting soil developed for Australian natives and other phosphorus-sensitive plants. It contains controlled-release nutrition designed to feed plants for up to nine months, together with rock minerals, trace elements, gypsum and iron to support soil structure and plant establishment.

$13.50 / 30L Bag

ALL-ROUND VALUE

Rocky Point Premium Potting Mix

ADVANCED

Reliable all-purpose potting mix.

A very good everyday choice for general container planting where a specialist mix or Pro-level UltraGrow formulation is not required.

$12.50 / 30L Bag

Botanica Moisture Plus Potting Mix

Economical potting mix for basic planting projects.

A budget-friendly option for general potting and seasonal planting where price is the main consideration. It has minimal nutrients and water-holding capacity, so it must be fertilised.

$7.50 / 25L Bag

$11.56 / 50L Bag

Specialist Commercial Growing Media

Purpose-designed media for podiums, planters and urban landscapes

Podium gardens, rooftop landscapes, large planters and urban tree pits require growing media developed for the conditions of the project. The correct product should be selected according to planting type, soil depth, structural loading, drainage design and the project specification. For specified landscape projects, confirm the required media with our team before ordering.

ULTRAGROW PRO COMMERCIAL

UltraGrow On Slab Podium Soil

Developed for elevated and contained landscapes.

UltraGrow On Slab Podium Soil is a lightweight growing media developed for podium gardens, rooftop landscapes and suspended planter beds. Available in A Horizon and B Horizon formulations, it is designed to provide the structure, drainage, moisture balance and root-zone support required in contained landscape environments.

Best for: Specified podium projects, rooftop gardens, suspended planters, raised planting areas and large landscape containers.

APPROX. BULK DENSITY: 0.78 T/M³

A $175 / t

B $166 / t

UltraGrow Native Podium Soil

Lower-phosphorus media for specified native planting.

UltraGrow Native Podium Soil is a lightweight podium growing media developed for projects requiring a lower-phosphorus planting environment. Based on the UltraGrow On Slab formulation, it is designed to provide the structure, drainage and root-zone conditions needed by suitable native plants in elevated and contained landscapes.

Best for: Native podium gardens, suspended planters and projects specifying lower-phosphorus growing media.

Important: Confirm the requirements of the selected plants. Not every Australian native species has the same phosphorus sensitivity.

APPROX. BULK DENSITY: 0.78 T/M³

$165 / t

COMMERCIAL ONLY PROJECTS

Commercial Podium Soil

Practical podium media for larger projects.

Commercial Podium Soil is a lightweight growing media for large planters, on-slab gardens and commercial podium landscapes where volume, functionality and value are important.

It is designed to provide a practical balance of structure, drainage and support for plant establishment across larger landscape projects.

Best for: Commercial podiums, large planter boxes, upper planting horizons and volume landscape applications.

APPROX. BULK DENSITY: 0.85 T/M³

$144 / t

Structural Soil

Root-zone support within load-bearing landscapes.

Structural Soil is a purpose-built media for urban landscape situations where the root zone must also function within a load-bearing structure.

It is suited to specified tree pits and infrastructure-adjacent planting where ordinary garden soil would not be appropriate.

Best for: Street trees, tree pits, urban landscapes and specified load-bearing planting applications.

APPROX. BULK DENSITY: 1.80 T/M³

$106 / t

Barks & Mulches

$134 / m3 **$10** / 40L Bag

Tea Tree Mulch

Tea Tree Mulch is a naturally dark and extremely fragrant mulch from the Tea Tree. With natural Tea Tree oils present, the perfume given off is refreshing.

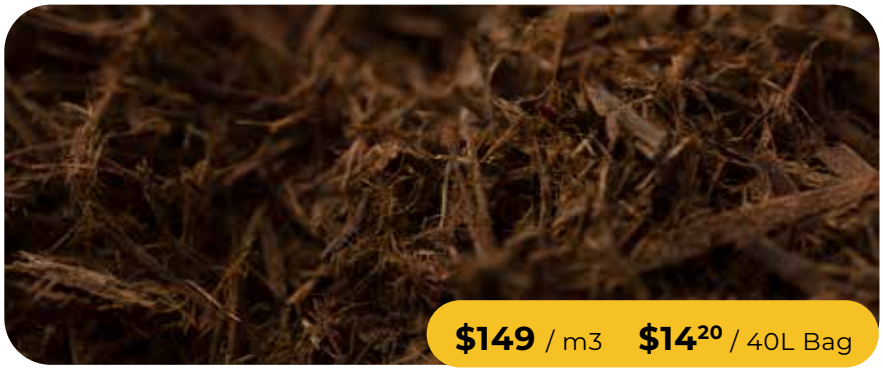
Reported to deter insect activity with the presence of natural oils.

Hoop Bark Medium

25mm strips (1 inch) of a strong dark coloured bark that tends to hold onto embankments, and also has a pleasing natural appearance.

It is your best and only option for steep sloped garden beds. Used by many landscapers and has been our most popular bark for many years.

$166 / m3 **$12** / 40L Bag



$149 / m3 **$14.20** / 40L Bag

Red Cypress Mulch

An attractive, fibrous, deep rusty red coloured mulch, which is suitable for all gardens and is one of our most popular mulches.

Mulch and woodchip sourced from the cypress tree is reported to deter inset activity, such as white ants, termites and cockroaches.

Cypress Woodchip

Golden chips from the timber of the Cypress tree. This wood chip is very clean with a consistent size and shape. It also has a lovely natural cypress timber fragrance.

Being from the Cypress tree, it is reported to deter white ants and termites from your garden.

$145 / m3 **$12.60** / 40L Bag

BULK BARKS & MULCHES

	Per M^3	Per 40L Bag
Aged Chippers Mulch This is a coarse, budget chippers mulch consisting of a wood chipper green waste material that has been aged.	$59	$7
Blended Cypress Fines A blend of fine mulch and small chip from the cypress pine tree. A finer option when compared to traditional Red Cypress Mulch.	$137	$11.30
Green Harvest Mulch 12- week composted garden organics from green bin collections. Processed through a star screen removing dust and unwanted material.	$69	$7
Hoop Fines Mulch A premium quality screened hoop mulch. It has a strong dark colour and also has a pleasing natural fragrance. From the bark of hoop pine trees on the Sunshine Coast, it is a classic garden staple.	$167	$12
Lucerne Mulch Increases soil nutrients for up to 6 months. It is specifically created for Australian home gardeners.	$21.50 per 18m2 bale	
Midnight Black Mulch A dark black dyed mulch developed to enhance the natural greens and colours of a garden or landscape.	$182	$13.20
Ochre Red Mulch Looking like the rich red sunsets of the Outback, our Ochre Red Mulch has a natural dye put through it to give it that rich, vibrant red colour.	$182	$13.30
Pine Nugget Bark 15-25mm nuggets of tan bark. A great mulch with a light texture and red/brown colour. The pieces are a traditional looking bark with a tidy appearance.	$131	$14
Sugar Cane Mulch Made from an organic renewable resource, our signature sugar cane mulch bale is fully dust extracted making it the best quality and cleanest garden mulch available.	$17.40 per 20$m^2$ bale	
Tropical Cypress Blend A good blend of cypress bark & wood chip that is one of the most economical of the cypress blends.	$137	$13.10
Chunky Pine Nuggets Natural tan pine bark provides low-maintenance coverage, suppresses weeds and reduces evaporation.	$149	-

SOFT LANDING SOLUTIONS

	Per M^3	Per 40L Bag
Soft Fall Pine Bark	$183	$18.90
Takura Soft Fall	$218	$20
Certified Play Sand	$194	$13

DROUGHT-PROOF YOUR GARDEN

COVER YOUR SOIL

Mulch is one of the most important things for the healthy growth of a garden. Weed prevention and temperature control are just a few of the benefits of using mulch, while the most valuable reason is moisture control. Without mulch, natural elements rapidly dry out the soil surrounding your plants, increasing the need to water on a regular basis. Mulch will help retain the water in your garden beds, reducing water usage.

STORE YOUR WATER

With Queensland in states of drought at numerous times over the past 20 years, water is precious. Now is the time to install water capturing systems. When planning a new lawn or garden, take the time to install in-ground irrigation systems like drippers which will slowly and efficiently serve up your plants just the right amount of water with zero wastage.

MAXIMISE MOISTURE

Soil additives such as organic composts, zeolite, perlite and Moisture Balancer are all designed to maximise water retention in the soil. A plant can only take up so much water at any given time, so saturating your sandy soil once a week, something that might seem efficient, will only feed your plants for a short time before drying out.

Lawn Care & Turf

A lush, healthy lawn is the pride of any outdoor space, adding beauty, value, and a welcoming feel to your home or landscape. At Centenary Landscaping Supplies, we understand the importance of quality turf and proper lawn care, which is why we offer a comprehensive range of premium turf varieties, soil blends, and maintenance products designed to help you achieve a vibrant, resilient lawn.

ESTABLISHING A NEW LAWN

Lawn Pro-MAXX
Foundation Soil

Engineered for lawn perfection.

PRO

Lawn Pro-MAXX is a premium under-lawn base crafted with over 75% natural soil and minerals for reduced slumping and strong root support. Unlike cheaper options, it includes a 16-month controlled-release fertiliser, 3-month nutrient blend, and advanced carbon technology, creating a microbe-rich, living soil. Zeolite and UltraGrow's Moisture Balancer ensure superior hydration, making Lawn Pro-MAXX ideal for those who want a lush, resilient lawn.

Bulk Density = 1.1 Tonne / 1 M3.

$229 / t
$18.5 / 25L

Turf Blend
Natural Soil

Reliable and ready for growth.

ADVANCED

Turf Blend Natural Soil is a dependable under-turf solution crafted for consistent performance. Comprising 90% natural sandy loam from the Lockyer Valley and 10% quality compost, this blend delivers excellent drainage and structure with the essential organic matter to promote strong root establishment. Ideal for projects that prioritise functionality and long-term results, Turf Blend offers a solid foundation for turf.

Bulk Density = 1.28 Tonne / 1 M3.

$125 / t
$8 / 25L

MAINTAINING THE PERFECT LAWN

Fairway Pro-MAXX
Top Dressing Sand

Elevate your lawn's surface.

PRO

Fairway Pro-MAXX is a premium top dressing sand for lawn enthusiasts aiming to elevate their lawn's surface. Crafted in small batches, it nourishes, smooths, and improves lawn profiles while supporting soil health long-term. This blend includes a high-quality granular fertiliser (10-2-8-6) with micro elements, humic acid, micronised gypsum, soluble kelp powder, and beneficial Bacillus subtilis microbes, dosed perfectly for up to a 10mm application and leaves USGA Sand in its wake.

Bulk Density = 1.5 Tonne / 1 M3.

$134 / t
$11 / 25L

Special Blend
Top Dressing Soil

Fine, nutrient-rich, and versatile.

ADVANCED

Special Blend Top Dressing Soil is a premium sandy loam sourced from the Lockyer Valley and processed through a fine 6mm screen. Blended with Enviro Compost, it enriches your lawn and garden with natural carbon and nutrients. This versatile product excels as a rich under-turf base, over-turf top dressing, or finely screened garden soil. For enhanced performance, pair with a quality fertiliser like UltraGrow Lawn Revitaliser.

Bulk Density = 1.2 Tonne / 1 M3.

$148 / t
$14 / 25L

A1
Top Dressing Soil

Balanced, organic, and nourishing.

STANDARD

A1 Top Dressing Soil is a composted organic blend of screened compost and sand, offering the perfect balance of nutrients and organic matter. Designed to boost soil health, it increases nutrient retention, improves drainage, and supports lush, healthy growth. Enhance results by combining your top dressing application with a fertiliser like UltraGrow Lawn Revitaliser.

Bulk Density = 1.2 Tonne / 1 M3.

$152 / t
$10 / 25L

Washed Pit
Top Dressing Sand

Precision-grade and greens-keeper approved.

STANDARD

Washed Pit Sand is a premium-grade, double-washed South Beach sand, carefully graded for superior consistency. Its fine texture makes it the ideal choice for top dressing lawns, especially for those seeking professional, greens-keeper-level results.

Bulk Density = 1.5 Tonne / 1 M3.

$93 / t
$7 / 25L

You could have the best lawn in the street, suburb or event the state! Start with the best quality turf such as Sir Walter Buffalo or Sir Grange Zoysia and pair it with nutrient rich under turf or top dressing. Don't forget to keep on top of your nutrient programme. A scheduled maintenance program is essential for sustained healthy growth and vigour. UltraGrow and lawns are a perfect match.

Sir Walter Buffalo DNA Certified

Sir Walter DNA Certified Buffalo Grass is Australia's favourite lawn; it's easy to maintain, stays green all year round and is very drought tolerant. Ideal for homes with children, family pets, shaded areas and sunny backyards, Sir Walter DNA Certified is the most versatile lawn option for the Queensland climate.

Sir Grange Zoysia

Sir Grange is a fine bladed premium turf variety, which has high shade tolerance and very low nutrient and water requirements. Sir Grange was originally developed for the golf industry but it was soon discovered that due to its characteristics, it would make a fantastic home lawn. Zoysia Grass is the ultra-premium extremely low maintenance option for the domestic lawn.

Turf Varieties	Slab 1200x600mm	M² 1.38 slabs
Aussie Blue Couch	$8.50	$11.80
Nullarbor Couch	$5.46	$7.69
Zoysia Australis	$12.27	$15.44
Sir Grange Zoysia	$18.57	$23.38
Sir Walter DNA Certified Buffalo	$12.27	$15.44
TifTuf Bermudagrass	$13.00	$16.36

**Turf is available to pick up throughout the week and over the weekend by the slab. We recommend ordering in advance so you don't miss out.*

TOP DRESSING 101:
Sand VS Soil

There are only 2 reasons you would ever need to top dress a new or established lawn. The first is to ***improve the level***, fill in holes or fix the grade and the second is to ***add nutrient back into the soil*** as part of your annual or regular lawn care program. In many cases, people find themselves top dressing to correct poor preparation. Both a lack of quality under soil and poor levelling or laying can expedite the need to top dress. So if you're just starting out in your lawn care journey, ***install the best soil your budget will allow and take your time!***

USING SAND
On its own sand will offer no long term nutritional benefit to your lawn or soil. But when strategically used to improve levels, drainage and soil structure, it can do wonders. Sand should be coupled with a liquid and granular feed in order to stimulate growth and aid in recovery. Using products like ***Fairway Pro-MAXX*** can take the guesswork out of top dressing.

USING SOIL
When top dressing for nutrients, a thin layer of an organic based soil over the area of your lawn will add organic material, natural nutrients and minerals back into your soil, and continue to provide food for your lawn to draw on.

WHICH IS RIGHT FOR YOU?
Choose a top dressing soil if your lawn is in need of a boost as it will encourage the production of new shoots and result in a thicker lawn with the added benefits of pest and weed resistance.
Chose a sand option when you need to fill holes, repair uneven ground, improve drainage and soil structure. If you do decide to go down the sand route, we recommend using Fairway Pro-MAXX, which is preloaded with fertliser and soil conditioning elements to encourage fast growth and recovery. For best results, aerate or core your lawn before dressing with either option.

Nitro-Pro MAXX
Professional Lawn Builder

UltraGrow Nitro-Pro Maxx is a professional grade mini prill turf fertiliser, containing upfront and multiple controlled release sources of nitrogen for optimum release rate and sustained turf growth.

Nitro-Pro Maxx also contains potassium in plant available and coated forms for sustained nutrient availability. Suitable for use on all lawns and trees.

Typical Analysis: NKPS 22-0-19-3

$40 / 5kg

Granular Fertilisers

UltraGrow's granular fertilisers are the perfect choice for delivering long-lasting nutrition to your plants and lawn. Packed with essential nutrients, these slow-release granules are designed to provide consistent feeding over time, promoting healthy growth, vibrant foliage, and strong root systems.

Revitaliser Fertiliser

Premium Lawn and Garden Fertiliser

UltraGrow Revitaliser contains a full suite of trace elements, organic carbon humates, cation exchange enhancements and root stimulants and will boost your gardens resilience and performance. Revitaliser is a complete rock mineral NPKS fertiliser impregnated with beneficial microbes and is designed to enhance garden and lawn surfaces by providing balanced nutrition for strong root growth.

Typical Analysis (16-3-7-4)

5KG Bag	$20

Nitro-Pro Maxx

Professional Lawn Builder

UltraGrow Nitro-Pro Maxx is a professional grade mini prill turf fertiliser, containing upfront and multiple controlled release sources of nitrogen for optimum release rate and sustained turf growth. The smaller granule size reduces the chance of fertiliser prills being damaged or picked up by mowing after application. In addition, the smaller granule will provide better coverage over the turf surface when applied offering superior performance.

Typical Analysis (22-0-19-3)

5KG Bag	$40

UltraCote Controlled Release

Red Jacket 16

Red Jacket 16 is a controlled release fertiliser coated with an outstanding tough and resilient polymer coating. Each granule contains all major nutrients and trace elements which are necessary for optimal growth. The nutrients supply coincides with the physiological requirements of your plants for up to 16-months in ideal conditions.

Typical Analysis (19-4-10-0)

Native 9

Native 9 is a controlled release compound fertiliser. The low phosphorous levels means it is suitable for all plants including natives. It provides a 9-month release of nutrients.

Typical Analysis (13-1.7-14.8-0)

2KG Red Jacket 16	$22.97	2KG Native 9	$24.95

Aquaten Wetting Agent

Soil Conditioner and Wetting Agent

UltraGrow Aquaten consists of at least 38% super absorbent anionic polymers that are cross-linked and insoluble in water. The polymers have the property of quickly releasing absorbed water nutrients and rehydrating, allowing plants to have water nutrients available as needed. UltraGrow Aquaten incorporates a high-quality volcanic pumice stone, a complete rock mineral NPKS fertiliser impregnated.

Typical Analysis (16-3-7-4)

5KG Bag	$110

Liquid Fertilisers & Bio-stimulants

UltraGrow's liquid fertilisers and bio-stimulants offer advanced, easy-to-use solutions for gardeners and lawn enthusiasts aiming to achieve vigorous, resilient plant growth. Formulated to provide essential nutrients and boost soil health, these products enhance root development and improve nutrient uptake.

DynaMaxx Pure Seaweed

Plant Food & Bio-stimulant

DynaMaxx Pure Seaweed is made from Ascophyllum Nodosum, one of the world's richest sources of micro-nutrients, alginic acid, essential amino acids, minerals and other complex organic compounds. It will promote lush growth in your garden, turf, shrubs, trees, veggie patch and ornamental. Use this as part of a balanced nutrition program to boost the efficient uptake of nutrients which unknown to you can be locked in your soil.

750ml RTU Trigger Sprayer	$7.51	2L RTU Hose End	$15		
1L Concentrate	$16	5L Concentrate	$70	20L Concentrate	$260

Power-MAXX Plus Lawns

IMPROVED FORUMLA

Lawn Revitaliser

UltraGrow Power-Maxx Plus is a powerful growth promoter giving you the best of both worlds with natural seaweed and traditional NPK fertilisers. Featuring many minerals, amino acids, natural growth stimulants, chelating agents and complex sugars resulting in a natural growth stimulant. It is crawling with billions of beneficial microbes and gives your garden all the benefits of natural seaweed plus a full range of nutrients.

2L RTU Hose End	$15	5L Concentrate	$85
1L Concentrate	$20	20L Concentrate	$300

Power-MAXX Gardens

Garden Revitaliser

This is a powerful but gentle growth promoter combining natural seaweed, fish emulsion, humates, amino acid and traditional NPK fertilisers. With carefully calibrated levels of nitrogen, phosphorus and potassium, Power-Maxx Garden is suitable for all plant and garden applications including natives. Foliar (leaf) application allows for the fast absorption of vital nurients and elements.

2L RTU Hose End	$16	5L Concentrate	$60
1L Concentrate	$15	20L Concentrate	$220

Deep Green

Nitrogen & Iron Fertiliser

UltraGrow Deep Green is a professional foliar fertiliser designed to provide an extremely available form of liquid Nitrogen (N) and Iron (Fe) along with Fulvic Acid. Fulvic acid improves nutrient uptake while also increasing nutrient-holding power.
Deep Green lives up to its name and delivers the results giving your lawn and garden an instant boost of growth and colour.

2L RTU Hose End	$15	5L Concentrate	$45
1L Concentrate	$20	20L Concentrate	$150

Fusion Humate

Premium Liquid Humus Solution

A natural soil conditioner that acts as a chelator and microbial stimulator containing a high concentration of organic acids and trace minerals. Humic substances are recognised by most scientists and agronomist as the most important component of a healthy, fertile soil. Fusion is the perfect companion to all seaweed based fertilisers and will supercharge your results.

2L RTU Hose End	$15	5L Concentrate	$45
1L Concentrate	$12	20L Concentrate	$175

Amplify Fulvic 10

Enhanced Soil & Plant Vitality

Humic and fulvic acid, are recognised by scientists and agronomists as essential components of healthy, fertile soil. Amplify, is a powerful biostimulant with a 10% concentration of potassium fulvate. It enriches roots, promotes nutrient absorption, releases locked-up nutrients in your soil and transports these nutrients throughout your plants and boosts photosynthesis in shaded areas.

2L RTU Hose End	$15	5L Concentrate	$60
1L Concentrate	$15	20L Concentrate	$200

Water-Wise

Natural Soil Wetter

A super concentrated Triple-Action Surfactant that is five times stronger than most wetters. It helps water penetrate repellent soils while also improving the water holding capacity. Water-Wise will assist the infusion of nutrients and growth stimulants. It's suitable for all applications including lawns, gardens, sandy soils, clay and rocky soils while being safe for use on pot plants, and natives.

2L RTU Hose End	$15	5L Concentrate	$98
1L Concentrate	$22	20L Concentrate	$350

Lawn Reno Pack

Everything you need to get your lawn in tip top shape and keep it that way!
The pack includes:

- Water-Wise
- DynaMaxx Pure Seaweed
- Fusion Humate
- Power-Maxx Plus Lawns
- Deep Green
- Revitaliser
- Calibrated Hose End Sprayer

$95

Earth-Ease Ground Breaker

Heavy Soil Liquid Treatment

A premium soil conditioner that transforms heavy, compacted soils for healthier plant growth. Powered by calcium-based organic acids and ionic exchange technology, it breaks up clay soils, improves soil structure, and boosts water and nutrient absorption. It will revitalise your soil by enhancing moisture retention, increasing microbial activity, and promoting stronger root systems.

2L RTU Hose End	$19.95	1L Concentrate	$10

Iron Life

Dark Green Lawns

Transforms all lawn types with this high-grade liquid Iron (Fe). Iron Life produces a rich dark green lawn within 24 hours without the stench of sulphur or the excessive leaf growth from Nitrogen rich alternatives. Iron is important for chlorophyll production while generating a darker green leaf. It's also a remedy for iron deficiency seen when plant and lawn leaves turn yellow.

2L RTU Hose End	$15	5L Concentrate	$55
1L Concentrate	$16	20L Concentrate	$160

Sonic Bloom

Healthier Buds, Flowers & Fruit

Sonic Bloom is chloride free, high potassium citrate/carbonate complex formulation, designed for maximum nutrient uptake into the plant. Scientifically formulated blend of rapidly absorbable phosphorus and potassium minerals that empowers flowers, fruit, and plants with the energy they need to thrive. This increases the quality and colour of your garden, lawn, and vegetable patch, and boosts photosynthesis even in shaded areas.

2L RTU Hose End	$15	5L Concentrate	$60
1L Concentrate	$15		

Seaweed Crystals

Concentrated Soluble Seaweed Forumla

These are a premium plant and soil enhancer made from North Atlantic seaweed, enriched with humic and fulvic acids. They boost plant growth, strengthen roots, improve soil health, and aid nutrient uptake. Lightweight and economical, just 10 g per 10 L water delivers 60+ trace minerals, natural hormones, and vitamins, helping plants thrive through stress, pests, and harsh conditions.

400 grams	$25	1 kg	$45

UltraGrow Calibrated Hose End Sprayer

Sprayer Companion for UltraGrow Liquids

Designed specifically for use with UltraGrow formulations, this sprayer ensures that your plants receive the perfect amount of nutrients and soil amendments every time. This model comes with a compact 2-litre capacity, enabling efficient coverage of extensive areas without the need for frequent refills. It includes two specialized nozzles: the Fish Mouth nozzle, ideal for enhanced soil penetration with its heavier droplets, and the Duck Bill nozzle, perfect for a gentler, finer mist.

2L Capacity	$25

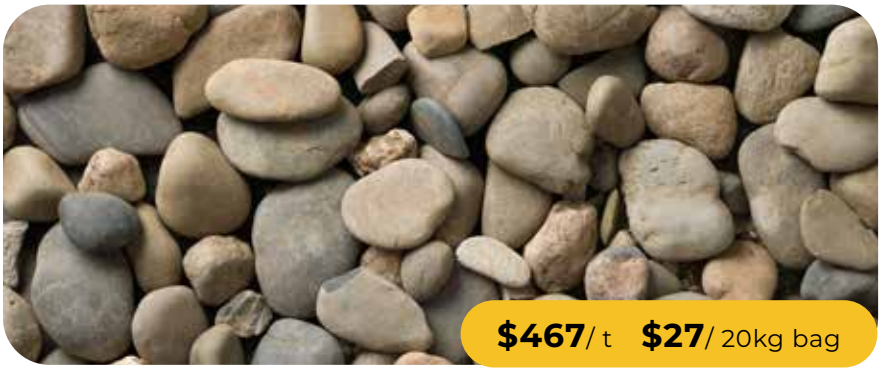
Decorative Pebble, Gravel & Stone

Cream Quartz 25mm

The angular nature makes it great for driveways and gravel pathways. The colour when washed and dry is an off-white, giving an overall white/ cream appearance.

Winter Grey 20-50mm

A striking dark grey pebble perfect for adding contrast and style to your garden or landscape design. When wet, the pebble is dark black and dries to a deep charcoal with hints of blue.



Nambucca River Oversize

The oversize option from our most popular pebble range. It has a beautiful neutral colour pallette and is the perfect option for all modern landscape designs.

The perfect river worn rounded stone for all your decorative needs.

River Pebbles 40mm

A natural river pebble with a varied colour palette ranging from browns and tans through to yellow and gold.

It is adaptable to many garden applications.

LANDSCAPING WITH STONE

USE AS A GARDEN MULCH

The most common use for decorative pebbles is as a mulch in garden beds. Pebble mulch is a great option for a number of garden types and although initial install costs might be slightly higher than traditional tree mulch, long term maintenance costs will be greatly reduced. Tree bark and mulch, will inevitably break down and require replenishment. Expect to be replacing your mulch every 6-12 months and bark every 12-18 months. Decorative pebbles on the other hand can last a lifetime!

USE AS A GROUND COVER

A great way to spruce up an otherwise dreary area is to add colour! And much like paint and carpet, decorative pebbles can do just that. If you have a neglected corner, an eroding pathway, or an unkempt and unwanted lawn, decorative pebbles might be your best option. We recommend at least a 50mm layer of pebble is used in order to get good even coverage and weed control matting is a must in these areas. In most cases with the use of weed mat (and a little bit of weed killer), the pebbles can go down straight over the existing surface for an instant facelift.

GARDEN & POT FEATURES

One of the easiest ways to smarten up your deck, patio or backyard is with large potted plants. Any potted plant can be finished off beautifully with a bag or two of decorative pebbles. With all the colours imaginable, you will have no trouble matching your pebble choice to your decor.

Metal Garden Edging

FormBoss offers premium steel garden edging systems that are durable, flexible, and easy to install, allowing you to create sleek, professional designs for garden beds, paths, and other landscaping projects.

REDCOR® Steel is an alloy designed to give you an aesthetic rust that looks great and stands the test of time.

This steel has an increased resistance to corrosion. This is because the steel forms a protective layer on its surface under the influence of the weather, which regenerates continuously over the steels life.

	Material Thickness	Each
2.44m x 75mm	1.6mm	$33.52
2.44m x 100mm	1.6mm	$39.62
2.44m x 150mm	1.6mm	$50.79
2.44m x 185mm	1.6mm	$63.99
2.44m x 230mm	2.0mm	$92.42
2.44m x 290mm*	2.0mm	$114.76
2.44m x 390mm*	2.0mm	$153.37
2.44m x 580mm*	2.0mm	$219.39
Tapered Stake x 240mm	2.5mm	$3.35
Tapered Stake x 300mm	2.5mm	$4.47
Tapered Stake x 400mm	2.5mm	$5.59

GALVANISED Steel will end up with a matte grey spangled effect after about a year of weather exposure.

Galvanised Steel edging blends in, as grey is a neutral colour and doesn't take the focus off the plants and lines of the garden. It creates flawlessly separated contrasts in your design.

	Material Thickness	Each
2.44m x 75mm	1.6mm	$33.52
2.44m x 100mm	1.6mm	$39.62
2.44m x 150mm	1.6mm	$50.79

90 degree corner	40-50mm	$1.87 each
90 degree corner	75-100mm	$2.16 each

WHY METAL GARDEN EDGING IS BEST

DURABILITY AND LONGEVITY

One of the most compelling reasons to choose metal edging is its remarkable durability. While timber can look attractive initially, it's prone to rot, insect infestation, and warping over time, even with treatment. Stone, though sturdy, can shift, crack, and become dislodged, particularly in climates with freeze-thaw cycles. Metal, on the other hand, is built to withstand the elements, particularly when made from materials like galvanised steel or aluminium that resist rust and corrosion. High-quality metal edging remains structurally sound and visually appealing for decades without cracking, shifting, or rotting, making it an incredibly low-maintenance solution.

DESIGN FLEXIBILITY AND VERSATILITY

Metal edging offers unmatched flexibility in garden design. Unlike stone, which is rigid and difficult to shape, metal can be easily curved or bent to follow winding paths, create circular beds, or contour around existing landscape features. This flexibility allows for endless design possibilities, making metal edging ideal for both formal and freeform garden layouts. While timber can sometimes accommodate curves, it often requires reinforcement to hold its shape, whereas metal maintains its form naturally. The ease of installation also means that metal edging is suitable for projects of all sizes, providing a versatile solution for gardens, lawns, and pathways alike.

LOW MAINTENANCE

Choosing metal edging means virtually eliminating maintenance concerns. While timber requires periodic treatments to prevent rot and stone may need occasional realignment, metal edging requires almost no upkeep once installed. High-quality metal edging is often pre-treated to resist rust and corrosion, allowing it to maintain its appearance and structural integrity for years without intervention. This low-maintenance feature is particularly appealing for busy homeowners and landscapers who want a solution that looks good year-round without constant care.

WHICH SAND IS BEST?

BRICKS, BLOCKS & PAVERS

Construction sand is the foundation for all brick, block and paving projects and quality sand can make or break a job. Our sand is high quality and clean, preferred by tradies around Brisbane.
For paving, Medium or Coarse Bedding Sand is best, it really is a personal preference but for a DIY project we suggest you stick with Medium. For laying bricks and blocks, we stock both Brickies Loam and Washed Pit Sand respectively. The former as the name suggests is the preferred option for bricks as a fatty loam sand, while the latter is preferred for blocks. Washed Pit is also perfect for paving mortar edges mixed with cement at 4:1.

SAND PITS & JUMPING PITS

Sand is commonly used in sand pits, jumping pits and playgrounds. We would recommend White Sand for a new sandpit, although Washed Pit Sand makes great sand castles, but is a grey colour. Soft Fall Sand may sound like the best option but it is certified to AS4422 as a soft landing product and is primarily used under play equipment such as swings or in jumping pits.

LAWN TOP DRESSING

For top dressing, Washed Pit Sand or Fairway Pro-MAXX Sand are the pick of the bunch, perfect for a fine lawn where a cylinder mower is used. Sand is best used as a top dress after coring or aeration which is the process of punching small holes into your lawn and removing a core of compacted soil. Using sand in this case allows the coarse sand particles to fall into the newly punched holes improving the soil drainage and permeability.
Alternate between organic based top soils and sand top dressing each season to ensure your lawn is receiving enough of the good stuff to thrive.

3m x 200mm x 75mm	$91.95

TREATED TIMBER

What's the right choice for your project?

WHAT IS CCA TREATMENT?

Copper chrome arsenate (CCA) treated timber is wood that has been treated with a preservative containing copper, chromium and arsenic. It should not be used to build children's play equipment, patios, domestic decking, handrails, new garden furniture, exterior seating or picnic tables. It is suitable for fencing and landscaping applications, and other structural foundations, residential construction, industrial and commercial construction, rural and farm use and fresh and salt water structures.

WHAT IS ACQ TREATMENT?

Like CCA, ACQ contains copper, which is non-toxic. It also contains a fungicide and a bacteriocide which makes your timber resistant to rotting. The quaternary ammonium compound acts as an insecticide and a biocide which helps fight copper-resistant microbes. ACQ treatment provides protection against termites and rotting. It also protects the timber from high sunlight exposure. However, it does have a green tint unless you stain or paint it. ACQ treatment is the recommended treatment to be used in applications where direct human contact will be common such as sandpits, or play structures.

WHAT SHOULD I USE AND WHERE?

Constructing landscape retaining walls and fences from CCA Pine or Hardwood is completely safe and recommended. The level of treatment required for in-ground applications is H4, where as H3 is suitable for above ground such as fence palings and rails.
If building a sandpit, veggie patch or any other structure where regular contact might occur, **ACQ treatment is a must**.

FAIRWAY PRO-MAXX

- High quality sandy loam
- Humic and fulvic acid
- Seaweed concentrate
- Trace elements and chelating agents
- Bio-inoculants like Bacillus
- Quality granular fertiliser (10-2-8-6)
- Zeolite based granular surfactant

AMAZING LAWNS

Fairway Pro-MAXX

Fairway Pro-MAXX is a premium top dressing sand for lawn enthusiasts aiming to elevate their lawn's surface. Crafted in small batches, it nourishes, smooths, and improves lawn profiles while supporting soil health long-term. This blend includes a high-quality granular fertiliser (10-2-8-6) with micro elements, humic acid, micronised gypsum, soluble kelp powder, and beneficial Bacillus subtilis microbes, dosed perfectly for up to a 10mm application and leaves USGA Sand in its wake.

SPECIFICATIONS: Bulk Density = 1.5 Tonne / 1 M3

$134 / t

$11 / 25L Bag
