LAWN SOLUTIONS AUSTRALIA

Lawn Solutions Australia is a network of family owned Australian turf Farms who grow and deliver a wide variety of premium turf varieties. Lawn Solutions Australia producers specialise in all aspects of turf projects, from small backyards, right through to sports fields, golf courses and public open space. All Lawn Solutions Australia varieties are backed up by the only industry 10-year turf product warranty.

Our producers grow independently certified turf varieties which are suited to all climates and all applications Australia wide, providing the perfect solution to your project. Each business belongs to an independent accreditation scheme, with all aspects of turf production, logistics and Work Health & Safety requirements above industry standards.

With years of experience in producing high quality surfaces around Australia, Lawn Solutions Australia turf varieties are perfect to include in your next specification.

AUSGAP

AusGAP is Australia's premier national Turf Certification scheme. AusGAP ensures certified members have all necessary documentation up to date and adhere to all relevant government rules and regulations. Further to this, AusGAP independently certifies every square metre of production grass from Lawn Solutions Australia members Australia wide. This ensures premium quality turfgrasses that are true to type.

AILA

The Australian Institute of Landscape Architects (AILA) champions quality design for public open spaces, stronger communities and greater environmental stewardship.

Lawn Solutions Australia is a proud supporting partner of the AILA and has been since 2015.

Lawn Solutions Australia is committed to assisting and supporting AILA and its members to design and create a better Australia.

NATSPEC

NATSPEC is a national not-for-profit organisation owned by government and industry and is committed to improving the construction quality and productivity of the built environment. NATSPEC makes writing specifications an easier process and ensures only top-quality products are going into the build.

Lawn Solutions Australia turf varieties are the only trusted turf varieties to have specification guidelines included in a NATSPEC branded work section.

TURF SPECIFICATION

HOW TO GET IT RIGHT THE FIRST TIME.

Ensuring you specify with the correct details for your turf project is paramount to the success of the works completed. To make sure the tenders you create specify the correct product with full certification, here is an easy to follow guide for building your turf specification document.

HOW TO SPECIFY THE RIGHT TURF VARIETY

1. Select the certified turf variety fit for purpose (see turf variety information on the following pages to make your selection)
2. Click and download the specification details using the button located in the top left corner of each page.
3. Utilise specification details in your specification document, simply copy and paste as required.
